-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings filed October 21, 2003 appear to be informal and are acceptable for examination purposes.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 11-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ammar et al ('926) or Kuntman ('558) in view of Baron, Sr. et al ('609).

The invention is substantially disclosed by either Ammar et al ('926) or Kuntman ('558) who disclose a weather radar system including, inter alia, receiving weather radar returns and applying thresholds. However, it appears that Ammar et al ('926) or Kuntman ('558) do not show providing a model of weather systems.

Baron, Sr. et al ('609) disclose a weather system in which a three-dimensional model of the weather data may be created by using data from the very recent past. If

Art Unit: 3662

data has been collected and time tagged, then a full three-dimensional model of the weather within the geographic area may be built based upon the old data. Alternatively, the model may be developed without the use of saved data, for example, by building the three-dimensional model, as weather data becomes available. The model may be updated by defining a periodic update period, or "heartbeat," for the data system (see column 8, 24-46).

Thus it would have been obvious to one of ordinary skill in the art to provide a weather model for the radar system of either Ammar et al ('926) or Kuntman ('558) as taught and as motivated by Baron, Sr. et al ('609) in order to process the radar returns to generate a weather radar display system.

Allowable Subject Matter

5. Claims 1-10 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B. Sotomayor whose telephone number is 703-306-4170. The examiner can normally be reached on Monday to Friday from 8:30AM to 5:00PM.
